- Selected Partner in IMDA Gen AI x Digital Leaders Grant
- Deployment of Data Lakes, LLMs, RAGs and others for future proofing
- Integrate with Clients' CRM & ERP

Next GenAI Products and Solutions

MICROSOFT FABRIC

Turn your data into a strategic advantage with **Microsoft Fabric**. Designed to simplify the entire data journey, Fabric unifies analytics, reporting, and AI capabilities in a single platform, enabling faster insights, greater efficiency, and smarter business outcomes.

What Microsoft Fabric Does

- **Unifies Data & Analytics** - Brings data engineering, warehousing, BI, analytics, and AI into one platform
- **Centralizes Data with OneLake** - Creates a single source of truth across the organization
- **Enables Real-Time Insights** - Supports operational reporting, dashboards, and analytics
- **Powers AI-Driven Decisions** - Connects trusted enterprise data with AI and Copilot capabilities
- **Integrates Across Microsoft Ecosystem** - Works seamlessly with Azure, Microsoft 365, Teams, and Power BI

Why Microsoft Fabric Works

- **Lower Total Cost of Ownership** - Replaces multiple disconnected analytics and data platforms
- **Faster Time-to-Insight** - Accelerates reporting and data-driven decision making
- **Built-In Security & Governance** - Unified governance, compliance, and data management
- **Single Integrated Platform** - Simplifies administration and reduces operational complexity
- **Enterprise Scalability** - Supports growing data volumes and analytics workloads

Designed & Developed For

- Large enterprises managing multiple data sources
- Organizations already using Power BI and Azure
- Companies pursuing AI and digital transformation initiatives
- Businesses struggling with fragmented reporting systems
- Organizations requiring real-time operational analytics
- Industries with strong regulatory and compliance requirements

Competitive Differentiators

- **OneLake Architecture** - Unified data foundation across all analytics workloads
- **AI-Native Platform** - AI capabilities for faster innovation
- **Microsoft Ecosystem Integration** - Native connectivity across Microsoft's business applications
- **Centralized Governance** - Consistent security, compliance, and data lineage
- **End-to-End Analytics** - Covers the full data lifecycle from ingestion to insights
- **Lower TCO** - Reduces infrastructure, licensing, and maintenance costs

ALLY GenAI Chat & Voice Bot

For corporates already leveraging Microsoft products like MS365, Business Central, and Power BI, our fully developed suite offers a seamless and integrated solution.

With support for English, Mandarin, and Malay, it ensures your business operates efficiently across multiple languages. Choose our suite for a cohesive, Microsoft-driven experience that enhances productivity and connectivity.
